

Shower Trolley

The Chiltern Invadex shower trolley range has been a popular choice with healthcare professionals for almost 20 years.

It provides a safe and secure bathing platform with smooth hydraulic height adjustment to guard against the risk of manual handling injury caused by the need for care givers to overreach.

The TRT3 model has a comfortable, padded bathing area which can comfortably accommodate children up to 122cm (4ft).

The large drainage pipe allows water to be discharged into any domestic outlet with no need for trolley specific plumbing.

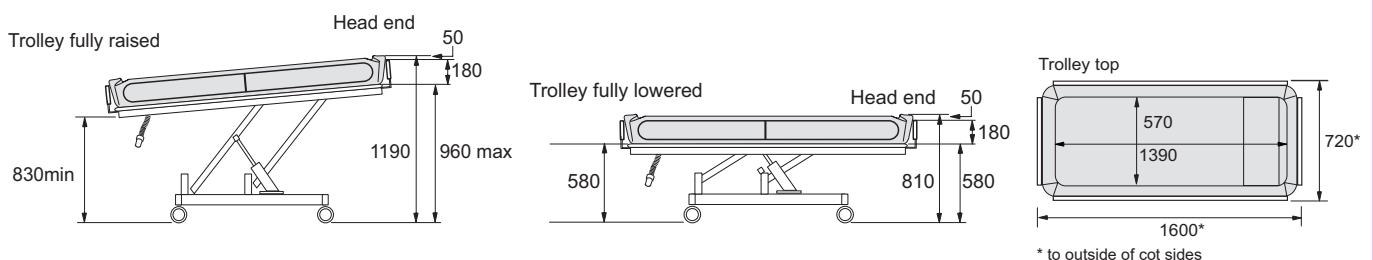

Features

-  Padded liner and head cushion
-  Durable plastic coated finish
-  Smooth hydraulic height adjustment
-  Option for electric height adjustment
-  Static height version available

-  Braked castors
-  Large drainage pipe
