

# 6 easy steps to fit a ... Westdale 655/760 Shower Enclosure

## 1. Marking the wall

Place the Westdale jamb with full height pole onto the side of the tray. Note: Ensure bottom fixing plate with holes facing outwards is in position as Fig 3.2. Position jamb approximately 55mm from the edge, as Fig 1.1. Make sure it is vertical as Fig 1.2 and mark the wall alongside the wall channel as Fig 1.3

Note: Pole supplied separately.

## 2. Drilling the wall and fixing jamb panel

Remove channel from jamb and place on wall as Fig 2.1. Using a pencil mark through the slots and drill the wall 50mm deep (2") using a 5.5mm drill, as Fig 2.2 & 2.3. Apply a film of silicone sealant to the inside edge of the wall channel.

Secure to wall with wall plugs and 1 1/2" x No 8 screws.

Push panel into wall channel. Fasten loosely with self tapping screws, slot covers and shakeproof washers provided. Repeat with pole section ensuring fixing plate is in position as Fig 3.4. Check panel is level horizontally and vertically. Screws are fully tightened later. The pole fixing plate is also screwed in position later.

## 3. Positioning tri-fold door

Place the tri-fold door onto the tray in its fully closed position ensuring the bottom seal is in contact with the tray, as Fig 3.1.

Ensure the wall channel is flat against the wall and is to the extreme left of the tray slot. This is for a left hand tray. It is on the right for a right hand tray.

Check the wall channel is vertical, as Fig 3.2 and mark the wall alongside the channel, as Fig 3.3.

# 6 easy steps to fit a ... Westdale 655/760 Shower Enclosure

## 4. Fixing tri-fold doors

Remove the tri-fold doors from the tray and slide off the wall channel. The slots on the wall channel should be facing into the shower area as shown in Fig 4.1. Using a pencil mark through the slots and drill the wall 50mm deep (2") using a 5.5mm drill. Apply a film of silicone sealant to the inside edge of the wall channel and secure to wall, as Figs 4.1-4.3.

Replace tri-fold doors, as Fig 4.4. Fasten loosely with self tapping screws, slot covers and shakeproof washers provided as Fig 4.5. Check magnetic strips are in contact with each other. Adjust doors to open and close correctly, ensuring the bottom seal is in contact with the tray.

When satisfied that doors are correctly adjusted. Fully tighten all screws, slot covers and shakeproof washers. Drill and fix pole fixing plate to tray with cheesehead screws provided, as Fig 4.6.

## 5. Fitting end caps

Fit end caps as shown in Fig 5.1. Black end caps need to be secured in position using silicon sealer. Fit pole cover strips, as Fig 5.2.

## 6. Fit curtain rail brackets and curtain

Position curtain rail at height to connect to bracket at top of grab pole. Check level & mark walls for fixing wall brackets, as Fig 6.1. Drill wall with 5.5mm drill to a depth of 2" (50mm). Fix curtain rail brackets to wall with plugs and 1 1/2" x No 8 screws, as Fig 6.2. Load hooks and glides into bottom channel of curtain rail. Place 1 M5 nut in top channel of curtain rail as Fig 7.1. Attach to brackets and tighten with the allen key provided, as Fig 6.3.

Check pole is vertical. Using M5 X 10mm stainless steel bolt attach to curtain rail with nut already in place, as Fig 7.1. Using 3/4" x 6's stainless steel screws secure pole bracket to top of pole rail, as Fig 7.2. Attach shower curtain to hooks on rail, as Fig 7.3.

# Westdale 655/760 Tray & Enclosure Installation Guide

## 7 easy steps to fit a ... Westdale 655/760 Shower Tray

page 1 of 4

### Installation Notes:

Safety note: Please wear protective gloves when handling trays.

Consult your client for the position/height of the shower mixer valve/heater and install inlet water and/or electrical services.

During assembly protect shower base from scuffing using a piece of cardboard.

655/760

Right Handed Westdale  
655/760

### 1. Floor removal

#### Preparing a wooden floor

Mark dimensions (from face of plaster) as Fig 1.1. Cut out floorboards as Fig 1.2. Trim any obstructions such as floor joists in area around waste trap and pipe.

#### Preparing a concrete floor

Break out screed or concrete to 20mm (3/4") depth to dimensions in Fig 1.3. You will also need to remove an area to a depth of 95mm x 125mm diameter to take the waste trap.

Note: To take up the space underneath the tray (to stop it from flexing) set the tray (showering area only) on a 3:1 dry sand and cement mix. Place tray on top for imprint, remove and position drain. Sprinkle surface with water, place tray on top and hold until secure. Always ensure the tray is level, as shown in Fig 2.1.

Fig 1.1 Westdale 760

Fig 1.1 Westdale 655

### 2. Marking plaster

Place the shower tray into the corner and ensure that the shower base is level along its width and length, as Fig 3.1.

Mark the plaster above the tiling lip, as Fig 3.2 and take the tray away.

**Important:**  
Tiles at A and B must be level and vertical to the tray to take the wall channels.

Fig 2.1

Fig 2.2

Fig 3.1

Fig 3.2

# 7 easy steps to fit a ... Westdale 655/760 Shower Tray

## 3. Remove plaster

Remove the plaster below the mark you just made to a depth suitable to take the tiling lip, as Fig 3.3.

This will vary according to the thickness of the tile to be used, as Fig 3.4.

Decide on direction of waste outlet and break out wall if required, as Fig 4.1.

If it is a solid floor, break out a channel to take the waste pipe to the stack.

NOTE: Always ensure there is adequate fall of waste pipe to stack.

Fig 3.4

## 4. Checking level

Replace the shower tray in position. Check level as Fig 3.1. Insert packing strips to level if required.

Assemble waste trap as shown in Fig 5.1. Coat trap body and underside of shower base above and below seal with silicone sealant. Connect waste pipe to stack outlet ready for final fixing of shower tray. Drill and countersink the outer edges of the tiling lip at the points shown in Fig 6.1. Mark and plug the walls.

Fig 4.1

Fig 5.1

## 5. Final tray fixing

Always ensure the showerbase edges are flat and level before fixing. Fix outer edges of tiling lips securely with 1 1/2" x 8 Pozi-Drive zinc plated countersunk screws provided.

Fig 6.1

Fig 6.2

## 6. Making good

Cut to length & mitre aluminium edging strip as Fig 6.2 using a hacksaw.

NOTE: Aluminium strip must butt up to edge of tray as shown in Fig 6.3.

Drill and countersink front edge of tray and aluminium edging strip, as Fig 6.4. White cover strip should be fitted after floor covering has been laid. Check to make sure the tray is level before final fixing.

Fig 6.3

Fig 6.4

## 7. Before tiling

Ensure any plumbing and electrical work has been completed. Make good plaster work. Tile down to the angle of the tiling lip using waterproof adhesive and grout.

Anti-slip flooring should finish over the aluminium edging strip as Fig 6.5. Apply a bead of mastic to tray edge and edging strip as shown in Fig 7.1. Finally knock the plastic trim cover into place, taking care to lock the components together as Fig 7.2.
