## Tip Up Shower Seat Range

### Showering solutions for home, leisure and caring environments

The Chiltern Invadex range of tip up shower seats offer a safe and hygienic showering solution for those who are wheelchair dependent or have difficulty standing through showering.

The standard range comprises over 20 seat variations, including horseshoe and aperture designs to aid washing.

Manufactured with legs as standard, shower seats are available with optional armrests and backrest to provide additional comfort and security.

In addition to the standard range, bespoke seats can be produced to suit users with specific needs. This includes height, width and aperture alterations.

The robust design can safely withstand a maximum user weight of upto 31 stone (200kg). Subject to wall construction.

#### Standard Range

**TUV18** Nylon reinforced PVC

**TUV13BL** Flat padded seat

**Padded Horseshoe**  
**TUV13LSH** Small  
**TUV13LMH** Medium  
**TUV13LLH** Large

**Padded Aperture**  
**TUV13ALSAP** Small  
**TUV13ALMAP** Medium  
**TUV13ALLAP** Large

**TUV19** Nylon reinforced PVC with backrest and folding arms

**TUV14L** Extra width padded bench 860mm  
**TUV15L** Extra width padded bench 600mm  
(horseshoe and aperture seat options available)

**TUV19P** Flat padded seat with backrest and folding arms (horseshoe and aperture seat options available)

The intuitive tip up design allows shower seats to fold neatly against the wall when not in use providing an ideal solution for multi-use bathing areas.

Shower seats are provided fully assembled and are easily fixed to virtually any wall construction.

An optional Surefix wall mounting kit (part number CHSFX) has been developed allowing safe and secure installation to timber studwork and soft blockwork.

It is important to remember that a wall mounted shower seat is only as secure as the wall mountings and the wall to which it will be fixed. We recommend that if there is any doubt a reputable builder/installer is consulted.

Each seat is supplied with non-slip adjustable feet which can be used to vary the seat height (at the time of fixing).

Standard models are supplied with legs which can be fitted to provide a seat height of between 458mm and 509mm.

At the time of order legs can be requested which allow height adjustment of between either 407mm to 458mm or 509mm to 560mm.

Adjustable feet can also be used to stabilise the seat on uneven flooring.

### Safety

Designed and tested with user safety in mind, the Chiltern Invadex range of shower seats meets the robust safety requirements of BS EN 12182È
